

BE A RUNNER - FEEL THE ENERGY

The perfect mix of lifestyle look and performance!

The new ATLAS[®] RUNNER reflect the style of the new workwear: FASHION MEETS FUNCTIONALITY

The new models offer an extremely flexible fit thanks to the tight-fitting monosock, the upper of which is made of a very comfortable, elastic and seamless LIGHT KNIT. The 100% woven and seamless upper combines optimal support and performance with pleasantly soft comfort for a natural running feeling.

The new "RUN-3" outsole system breaks entirely new ground in the combination of the materials for the outsole. The 3-layer structure of flexible nitrile and the established multifunctional polyurethane (MPU) guarantees maximum performance and a trendy sneaker look.

In addition to the high functionality, the shoe is also worth seeing outside of the working world due to its design. A safety shoe or a sneaker? The carrier decides.
