Yaktrax Pro Anti-Slip System

The Yaktrax Pro are traction aids that can be slipped over the shoes to gain more grip and stability on snowy and icy surfaces. They are made of a combination of natural rubber and steel spirals that adapt to the shape of the shoe sole. The steel spirals are designed to penetrate snow and ice, providing traction and stability. They are easy to put on and take off and are suitable for a variety of activities, such as walking, hiking and light running. Yaktrax Pro are a popular choice for people who live in areas with snow and ice or like to be outside in winter.

- Coils: Highly abrasion-resistant steel 1.4 mm - contains 70% recycled material
- Straps: Removable natural rubber
- Spiked and ultra-lightweight design
- 360° traction with patented non-slip coil system

Sizes: S (38 - 40), M (41 - 44), L (44 - 46), XL (>46)
